Summary

Aspiring full stack web developer with less than a year of programming experience, but holds a strong passion for learning new technologies and recent graduate of a coding bootcamp. Loyal worker and a fast learner, with strong team-based values and a drive to quickly solve problems.

Education

THE UNIVERSITY OF TEXAS AT AUSTIN WEB DEVELOPER CODE BOOTCAMP | NOVEMBER 2019

Graduated from the Full Time 12week U.T. Web developer Code bootcamp in Nov. 2019 and logged over 1000+ hours of coding time.

Learned and applied Full stack development skills in over 15 technologies.

AUSTIN COMMUNITY COLLEGE | DECEMBER 2005-2008
MAJOR: GENERAL STUDIES, SCIENCE

Technical Skills

Skills: HTML, CSS, GIT, BOOTSTRAP, JavaScript, JQuery, FireBase, Node.JS, MySQL, Express, Handlebars, Sequelize, MongoDB, React, GitHub, Heroku, Microsoft visual studio, Chrome DevTools, Chrome debugger.

Microsoft Office Excel, Powerpoint, Word, Outlook email.

Projects

Related coursework: Significant contributor to 3 group projects:

- **Project1:** "Austin Map App" is a web application that finds interesting things to do in the city. We integrated a couple of different API requests including yelp and leaflet. Bootstrap and CSS were used to create a polished front end. **Github deploy:** https://redededoo82.github.io/ProjectOne/
- **Project 2:** "Lone Star Prospects" is a web application where users can filter through highschool football player statistics for the purpose of college recruiting. We utilized Node.js and MySQL for the backend. Successfully deployed the app on Heroku and used mysql plugins. **Heroku deploy**: https://safe-gorge-92187.herokuapp.com/
- **Project 3:** "Leave No Trace" is a single page web application built using the MERN tech stack. It was designed to provide a mobile web based community where users can safely plan after party events after attending other music events. **Github deploy:** https://redededoo82.github.io/project3/

Experience

THUNDERCLOUD SUBS | MARCH 2009 - JULY 2019
